

8 Ways Your Business Bleeds Cash (and How to Stop the Flow)

Think your business may be hemorrhaging money, but not sure where or how? Check out these 8 cash bleeders and how Clover can help you slow the flow.

1 MESSY INVOICING

Streamline your invoices with branded looks, current customer info, and clear explanations of charges and late penalties.

2 LATE BILLS

Stay on top of your bills with apps like [Sweep and Save](#) or [DAVO](#) for Sales Tax. Keep vendor bills organized with [Sourcing Club](#).

3 MISHANDLING CASH

Don't let cash walk out the door. Know who's handling it with [Cash Log](#), and reduce change-making mistakes with [CoinOut](#).

4 OVER- OR UNDER-STAFFING

Map out a weekly schedule based on average hourly/daily transactions, and reduce no-shows with apps like [Homebase](#).

5 PERISHABLE INVENTORY

Stay on top of inventory costs—especially perishables—with [Recipe Keeper](#) or [Bottle Keeper](#).

6 FRAUD

Don't let cash fraud slow your cash flow. Get alerts on cash-related events like an open till or deleted transaction with [Ping Me If](#).

7 NOT KNOWING THE NUMBERS

A healthy business starts with understanding and tracking your KPIs (Key Performance Indicators).

8 UNPLANNED EXPENSES

Plan for the unexpected. Apps like [Savings Club](#) help manage monthly and year-end expenses.
